

Grace and peace to you all!

Have you been able to "shop" on-line? Are you still getting mailed delivered? and packages?

When you go to the pharmacy or grocery store - is there someone who delivers your order to your vehicle door?

Have you been able to get your vehicle filled with gas?

Yes - the way we are doing things is certainly different... and can even be somewhat frustrating.

It is hard to be patient when our loved ones are not feeling well, or we're not feeling well ourselves or suspect CoVid19 infection.

But it is also very hard on those who are trying to be "there" for us.

There is an enormous amount of pressure and stress being placed upon First Responders and "essential" persons.

Not meaning to do harm, some are projecting their frustrations and impatience on the very people who are there doing their best to help and support them. Know what I mean?

It was suggested to me that we show our appreciation to the "essential working force" by writing notes of appreciation -

or by making cut-out hearts and other written messages that can be taped in our car windows to the person filling our gas tank...

or to the retail persons filling our grocery order.

To tape thank you notes (facing inward) on windows and doors to the workers at ShopRite... Lidl's... Aldi's... and the Pharmacies... doctor's offices... and other business that are still open and offering their services to us.

This would certainly help them to know that what they are doing is so GREATLY appreciated by all of us!!!

It would help to give them hope in knowing the gift they share of them-selves is truly making a difference.

It would be the grace and love of Jesus Christ in action to uplift spirits.

I invite you to put a heart in your vehicle window or home windows to let others know they are our heroes... that as they leave their family members at home... we are truly grateful for the sacrifice they're making for us.

God bless you all!!!!

PL
